**Recommendations:**

Please also think about your safety accessories ! Valves, pressure reliefs, filter etc. can be found accordingly in the HDM pro accessories list.

**MID Notes:**
**********
For systems / instruments that were placed on the market in accordance with the EC Measuring Instruments Directive (MID) 2014/32/EU, the standard initial calibration has been replaced by a conformity assessment process according to module F testing by a notified body. We, the manufacturers or a representative authorised in writing, must submit the application for a conformity assessment to a notified body in compliance with module F of the Measuring Instruments Directive. Therefore we require the location of the system / instrument. The date will be fixed by the installation partner (tank construction firm, workshop suppliers). The cost of a conformity assessment is based on expenditure; A scale of charges as applied for the initial calibration does not exist here. The manufacturer charges the costs to the installation partner which one will then usually charge the customer.
