

ADBLUE® AUTOMATIC NOZZLE CAR

Article number: 252713010

EAN:

DESCRIPTION

In order to achieve the EURO 6 limit values for nitrogen oxides (NOx), diesel-powered passenger cars and light utility vehicles are now also being equipped with SCR technology. □The AdBlue® tank technology for trucks and heavy utility vehicles is mostly incompatible with passenger cars and light utility vehicles. □The automatic nozzle for passenger cars is designed specifically for filling tanks in passenger cars. □The outlet pipe fits passenger cars with an ISO 22241-5 filler neck.

Variants:

Automatic nozzle for AdBlue® for passenger cars; to protect against incorrect filling, the dispensation of AdBlue® is only possible with ISO22241-5-compliant filler necks. Flow rate max. 10 l/min.

Material:

- Housing of aluminum, chemically nickel-plated with polymer coating
- Outlet pipe made of fiber-reinforced plastic with integrated protection against incorrect dispensation
- Inner components: stainless steel and POM
- Guard and switch lever: PA
- Protective covering and cold protection: PVC
- NBR seals
- Rotating hose connector made of stainless steel with R1" outer screw thread
