Advantages

Secure & Reliable
Server located in Germany

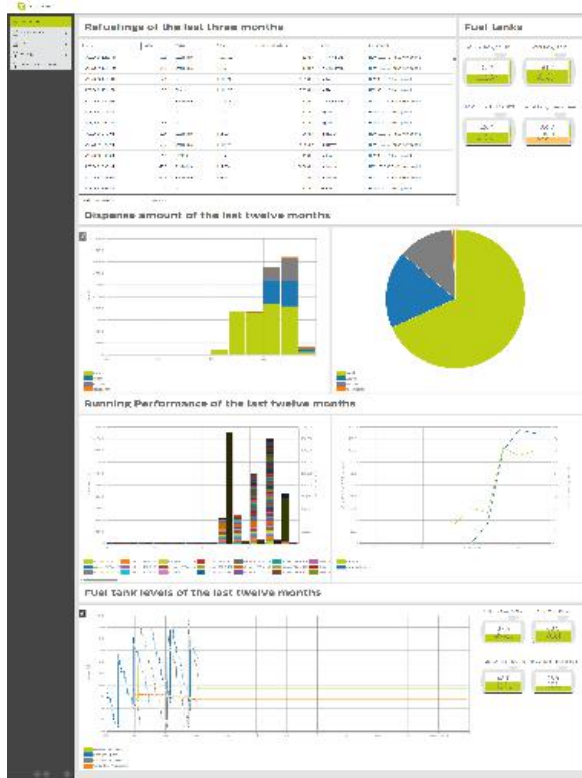

Higher Productivity
Process automation

Comprehensive Reporting
Data Presented Clearly

Enhances Collaboration
Makes working together easy

Dashboard

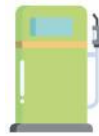

With a clearly structured interface and intuitive features, the dashboard is the heart of the myTecalemit web software, helping to efficiently manage and optimize daily operations.

- Everything at a Glance
- Real time data
- Easy to understand
- Easy to use

Set Up and Manage

Manage your data and devices through a clear and intuitive interface.

- Centralized Device Management and Configuration
- Master Data Management
- Master Data Import for Quick Data Entry

Reporting

- Tailored Analyses
- Variety of Evaluation Types
- Automatic Report Generation and Delivery
- Free Object Selection
- Customizable Tables
- Flexible Export Options (CSV & PDF)

See

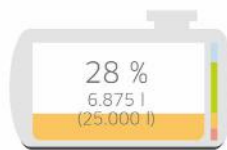

- Current Tank Level
- Refills
- Dispensed Quantities
- Fuel Level History
- Distance & Operating Hours
- Range Estimation
- And much more

Thanks to individual analysis and reporting tools, you can filter out exactly the information that is crucial for operations - anytime and from anywhere.

Tank Level

Notifications
Thresholds
Alarms

API-Clients

The API interface allows for the integration of the myTecalemit Cloud into other systems.

- Data Integration
- Real-Time Data Access
- Automated Processes
- Scalability and Flexibility

Tank Management

See your tank level in real-time and set thresholds for alarms and notifications.

This way, you can always keep track of your resources and make informed decisions.

Authorization Management

Use roles and authorization processes to grant your users exactly the permissions they need.

- PIN Code
- Transponder
- User Roles
- Groups
- Dispensing contingent

Modules

BASIC | STANDARD | PREMIUM

Your benefits with the 3 package options

- Easy entry level for all device types
- Module division only according to software functionalities
- Independent of hardware
- Future-oriented through scalability
- Reduction of administrative effort
- Clear structure / transparency
- Automated billing
- Payment via invoice, PayPal, credit card, etc
- Upgrade to the Premium module anytime
- 14-day trial version of the Premium module

- 1 Fuel dispensing systems
- 2 Level measurement devices
